About Snitch

Mission Statement :

Snitch's mission is to redefine men's fashion by providing stylish, affordable, and trend-driven clothing that caters to the modern, fashion-conscious man, while also embracing sustainability in its operations.

About Snitch

About Snitch

Business Model :

-
-
-

Special Note:

Snitch employs a comprehensive digital marketing strategy to enhance visibility and customer retention through social media campaigns and targeted advertising, which have contributed to a 50% returning customer rate.

PROBLEM STATEMENT

Snitch aims to increase its Average Order Value (AOV) from INR 2,500 to INR 5,000 within the next 12 months. A higher AOV will also play a crucial role in driving up Customer Lifetime Value (CLTV) by encouraging customers to spend more per transaction, thus maximizing revenue per customer.

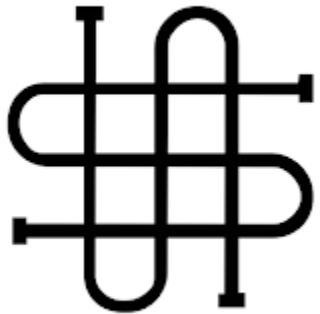

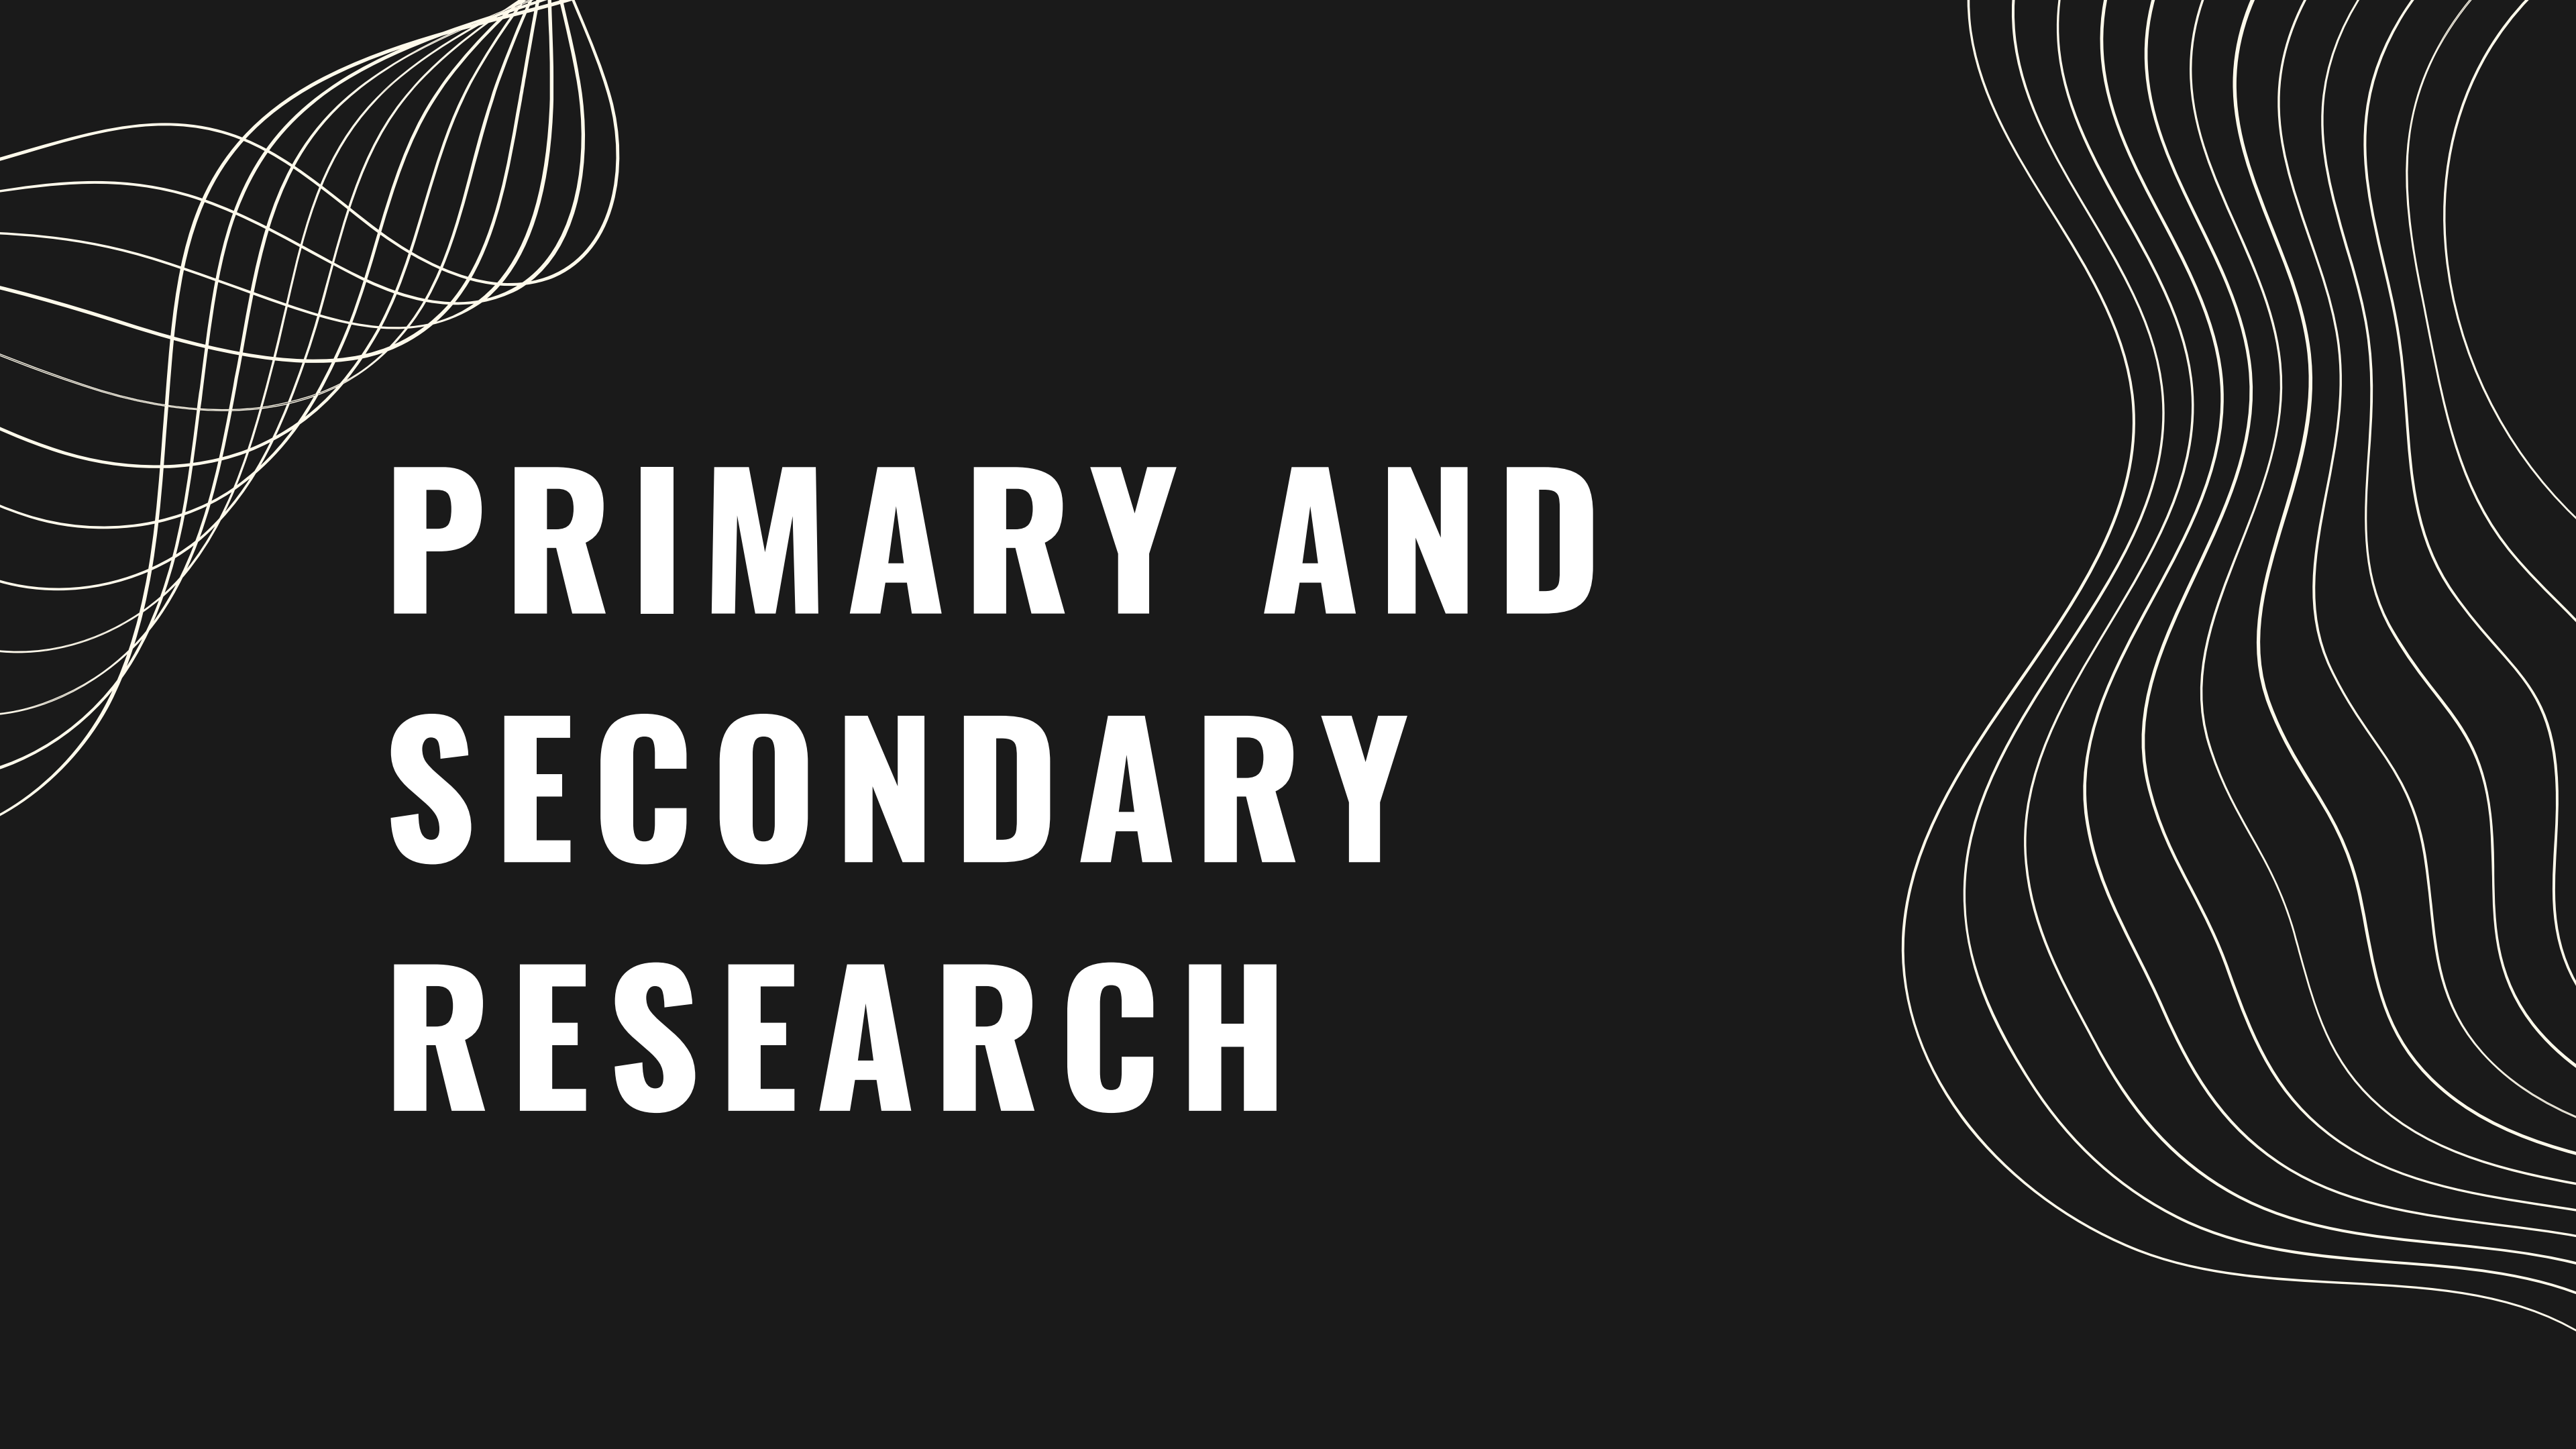

GOAL : Increase the Average Order Value (AOV) from INR 2,500 to INR 5,000 within 12 months.

COMPETITOR ANALYSIS

USER PERSONAS

The FASHIONISTA

Rahul Bajaj

Age 32

Location : Bengaluru

Occupation : Software Engineer

Behaviors

Shops online 2-3 times a month

Follows fashion influencers vividly

Willing to spend on quality and style

Values brands that align with his lifestyle and values

Pain Points

Limited options for complete outfits or looks.

Difficulty in finding clothes that fit well without trying them on.

Lack of personalized recommendations.

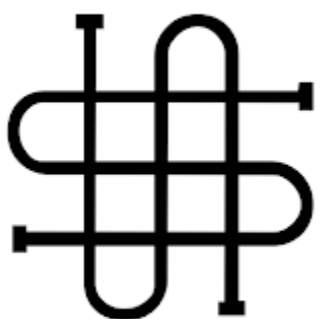

Snitch Opportunity:

Latest options for complete outfits or looks.

Ease of size explanation available with Snitch.

Personalized recommendations based on order history.

The TRENDSETTER

Aryan Kumar

Age 23

Location : Mumbai

Occupation : Recent MBA Graduate, starting a tech startup

Behaviors

Shops online once a month

Active on LinkedIn and Twitter, networking with industry professionals

Seeks a balance between professional and casual wear

Brand-conscious, sees clothing as part of his personal brand

Pain Points

Struggles to find versatile clothing suitable for both investor meetings and casual networking events.

Concerned about the durability of clothes due to frequent wear

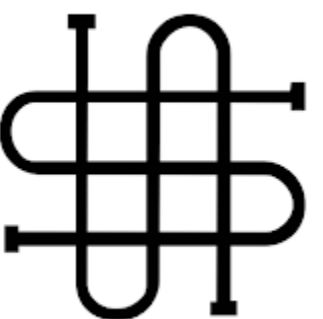

Snitch Use Cases:

Different categories according to need.

Great quality products guaranteed with Snitch.

Lots of options to choose from depending upon the occasion.

The WORKAHOLIC

Vikram Roy

Age 46

Location : Pune

Occupation :Senior Marketing Manager

Behaviors

Shops online every 6-8 weeks

Values convenience and time-saving shopping experiences

Willing to invest in premium items for work and special occasions

Pain Points

Difficulty finding business casual outfits that stand out in a corporate environment

Limited time for shopping, needs efficient and quick purchasing process

Struggles to stay updated with changing fashion trends appropriate for his age and position

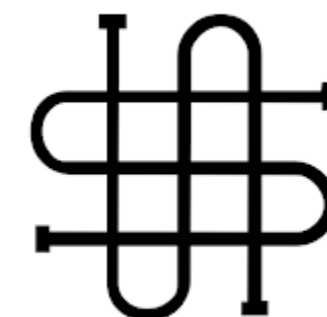

Snitch Use Cases:

Lots of options for outfits depending upon the need.

Efficient and direct recommendations.

Latest trending fashion available on Snitch.

The NOT-FOR-ME-SHOPPER

Gargi Sengupta

Age 29

Location : Pune

Occupation : HR Specialist

Behaviors

Shops online every 3-5 weeks

Values trendy and fashionable items

Spends time searching for items to gift to her spouse or unisex clothing.

Pain Points

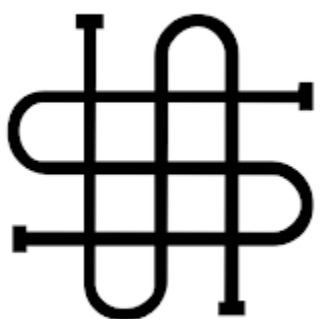

Difficulty finding unisex clothing/ oversized items
Needs efficient and easy process to find clothes for herself and her spouse.

Wants to be able to buy more frequently but is often disappointed with limited collection

Snitch Use Cases:

Can provide recommendations in unisex fits.
Efficient and direct process to locate clothing
Latest trending fashion available on Snitch.

Ratings and Reviews

Gagandeep Singh

August 22, 2024

Dear Snitch team, You guys need to fix your product list page. It's giving a bad user experience to us. When we click on any product to view and then go back to the previous list window. App always gets refreshed and goes back to the top. Whereas this shouldn't be the case, user should be redirected back to the same checkpoint they had left from that page. Scrolling down back to the same product each time is very annoying. I'm assuming many users would get frustrated with this thing. Pls fix it.

August 26, 2024

My experience is very bad, on Snitch they do not have any proper or dedicated customer support team, when I need the customer support from them, they have only two options, first is Instagram message and second is WhatsApp, actually your Didn't get any help from either of these platforms as both give you pre-filled messages, in fact you didn't connect or get any contact from any of their agents. It is fortified. 🙄🙄🙄

Lots of problems with that app.. 1. It takes time to remove items from cart. 2. If i add too many items on wish list, it takes time to open wishlist & after opening you can't see most of the items picture. 3. When you are viewing products & back from that product it will not show where you left. It will refresh send you to the top.

The color is vibrant and really adds a fresh look to my attire. The fabric is comfortable and fits perfectly, with a great material that feels good to wear. The stitching is strong, making it durable and definitely worth the price. Overall, it's an excellent value for the money. I highly recommend giving it a try!

"I recently purchased 2 shirts from snitch and I'm really impressed with the quality and fit. The fabric is soft and comfortable, and it looks exactly like the pictures on the website. I had a question about sizing and the customer service team was quick to respond and very helpful. Shipping was fast, and the packaging was secure. I've already received a few compliments on this outfit and will definitely be shopping with this brand again. Highly recommend!"

I recently purchased a few items from Snitch and I must say, I'm thoroughly impressed! The quality of the clothing is exceptional, and the designs are both trendy and unique. Not only did my order arrive promptly, but the packaging was also eco-friendly, which I appreciate. Overall, Snitch exceeded my expectations, and I'll be a loyal customer for good. The Snitch team deserves a big thumbs up! 👍👍👍

North star Metric (NSM)

North Star Metric

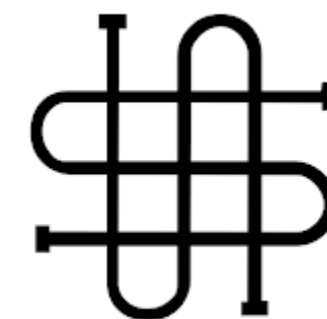

Given the original problem statement of increasing Snitch's Average Order Value (AOV) from INR 2,500 to INR 5,000 within a 12-month period, our North Star Metric will be:
Revenue per User (RPU) per Month

This metric combines AOV with purchase frequency, giving us a more comprehensive view of user value.

It directly reflects our goal of increasing order value while also capturing improvements in customer engagement and retention.

Formula: $RPU = \text{Total Monthly Revenue} / \text{Number of Active Users}$

Target: Double the current RPU within 12 months
